

SAY HELLO TO THE ULTIMATE SANITIZING CABINET

Dear Parents,

We would like to introduce you to the ZONO Cabinet, a revolutionary new disinfecting and sanitizing system for toys, stuffed animals, rest mats, electronics, and more. We will simply place items in the ZONO, and the ZONO will do all of the work for us, without user exposure to chemicals. This will allow us to focus on the work we enjoy — taking care of and teaching your children.

What is the ZONO? The ZONO is a “green” disinfecting and sanitizing system that is based upon technology used in the medical device and food processing industries. Ozone and humidity are generated inside the sealed ZONO cabinet, and 30 minutes later items are disinfected and sanitized. The ZONO cabinet provides a safe environment for disinfecting and sanitizing. Ozone monitoring sensors are located inside and outside the cabinet to ensure that the ZONO is operating safely.

What does the ZONO system do? The ZONO kills common viruses+ and bacteria*. It is an important part of a comprehensive disinfecting and sanitizing routine. The eco-friendly technology uses less than an ounce of water and three cents of electricity per cycle.

What can we put in the ZONO? Just about EVERYTHING! ZONO all dolls, Legos, blocks, electronics with batteries, art supplies, toys, manipulatives, soft play items, crayons, infant walkers, crib mattresses, mats, bouncy seats, activity tables, and more.

Is the ZONO like a dishwasher? No, the ZONO is NOT intended for food, beverages or their containers. The ZONO does not wash or clean; it disinfects and sanitizes.

Who can ZONO? ONLY trained staff may operate the ZONO. So, if you're curious, stop by and see our ZONO! You'll see that we make every effort to keep your children healthy!

+Norovirus on non-porous surfaces. *Staphylococcus aureus, Methicillin-Resistant Staphylococcus aureus, Escherichia Coli, Streptococcus Pyogenes, Shigella dysenteriae, Salmonella Enteritidis, and Pseudomonas Aeruginosa on non-porous, semi-porous and porous surfaces.
